

# exolution

Natively • Redact • Pseudonymize • Anonymize

Standalone and Integrated with

In the last 15+ years, the native review has become standard in eDiscovery, but native redaction has not. The process of converting documents to images for the purpose of redacting is ongoing, but at a slow pace making it more expensive and time-consuming.

In 2015, Litexn developed Exolution to close the gap and standardize native redaction in the industry.

Since then, Exolution has been at the forefront of this trend, setting new benchmarks in areas like the breadth of native file formats support, the size of redacted files, and redaction speed. Excel, CSV, ODS, PDF, Word, ODT, MHT, EML, RTF, TXT, and TIFF are among the supported formats.

Exolution is a complete, up-to-date, and easy-to-use solution to redaction, pseudonymization (masking), and anonymization needs.

## Don't Produce What You Can't See

Uncover hard to detect invisible data that can make a difference

## Dual User-Interface

Web-viewer for convenience, Desktop-viewer for large files

## Millions of Redactions in Minutes

Search and redact millions of values across large collections in minutes

Exolution is a feature-rich, fast, and user-friendly native redaction technology that can reduce the time, cost, and pain by over 90%. It's the ideal tool for ensuring compliance with data privacy regulations like the General Data Protection Regulation (GDPR), the Freedom of Information Act (FOIA), the Health Insurance Portability and Accountability Act (HIPAA), and the California Consumer Privacy Act (CCPA) thanks to its automated PII/PHI detection and mass redaction capabilities

## Key Features:

### Expose Hidden and Protected Content

Avoid leaking encrypted or hidden sensitive information.

Automatically remove internal passwords to make all data visible, identify data located beyond the page boundary or cell display limits and find invisible data with the same text and background colors

### Search and Instantly Redact

Why put up with the stress of auto-redaction batches that may go on indefinitely? To redact millions of records quickly and easily, just execute a search in Exolution at either the document or global level, analyze the results, and redact as many as you want. Pattern and value-list redactions are easier than ever

### Advanced Features to Handle Spreadsheets

Spreadsheet document's complexity makes them challenging to redact. Exolution is packed with cutting-edge features that make it easy to manage a huge spreadsheet document

- Automatically unhide all hidden rows, columns, sheets, and very-hidden sheets including password-protected sheets by removing internal passwords
- Excel like row based filtering and mass redaction
- Identify duplicate sheets across non-duplicate documents, or visually similar sheets, and redact. Spreadsheet threading is also an option
- Don't risk reviewers missing scattered data residing in remote rows and columns by hiding consecutive empty rows and columns
- Extensive sheet and document-level inverse redaction options

### Innovative PII Explorer

Using the PII Explorer, you may quickly and easily remove millions of sensitive values in minutes. Get common PII values like credit card numbers, social security numbers, and birthdays, or define your own using keywords and regular expressions

### Redaction Collision Detection

Redaction collision detection is included to avoid redaction overlap

### Color-Coded and Point-n-Click Redactions

Easy to locate color-coded point-n-click redactions. Select an area or object to be redacted and add or remove redactions with a mouse click.

### Quick and Accurate TIFF Redaction

Redacting thousands of pages with precision takes minutes, not hours. No ambiguity between the meanings of characters like '0' and 'o' or '1' and 'l'. Effectively search multi-line data, like addresses.

### Real-time Redaction Propagation

Redact all duplicates in real time without any extra steps

### Pseudonymization (Masking)

Redacting values with corresponding masking values keeps entity relationships in view

## RaaS (Redaction as a Service)

Litexn offers this hard-earned expertise to quickly and accurately apply customized redactions based on complex specifications on native and rendered documents. Provide unredacted documents with redaction criteria and receive redacted documents from us.

Litexn has in-depth knowledge of both native document structures and redaction technologies thanks to its role as the designer of cutting-edge redaction technology.

In certain cases, thinking outside the box is just not going to cut it. Redaction technology professionals may need to be consulted for large quantities and sophisticated redaction requirements. With Litexn's RaaS, you'll have a convenient tool for handling emergencies of this kind.

## About Litexn

Litexn LLC is an eDiscovery software and service provider company, registered in Virginia - USA. Litexn developed software Exolution, a native file review, and redaction software. Litexn licenses Exolution to their clients for in-house hosting as well as provides SaaS to law firms, e-discovery service providers, corporations, and government organizations.
